RAYNOK

MICRO+ OPERATOR PENDANT

PRODUCT DESCRIPTION:

Carry the full power of the Raynok Motion Control Software platform on stage with the Raynok Micro+ Operator Pendant and eliminate the need to call back to the booth for machine control.

The handy versatile device can be the main operator station for a small installation or be added to larger installation to allow users to operate machinery locally for maintenance, change-over or setup purposes. When combined with a Raynok-NAS or Raynok-Server machine management and access can be constrained by user and/or location.

A perfect solution for any venue where the operator needs mobility such as arenas, large or small theatres with multiple machines or touring productions.
