NAS & NAS+REMOTE

PRODUCT DESCRIPTION:

The Raynok NAS and NAS+REMOTE are the backup companion for any Raynok Motion Control System installation.

The NAS portion of the box is a Network Attached Storage device which acts as both a repository for all of the files created or used as part of the operating activities of the Raynok system. The NAS also serves as a budget conscious "server"supplying a central location for all operator consoles to locate, share and distribute systems files.

The +REMOTE portion of the device includes a secure web portal access device that can be managed by your local IT team to allow a remote Niscon technician to call into the network for maintenance, service, support and operator instruction.

Add a RAYNOK-NAS or RAYNOK-NAS+REMOTE to your system for the added security and management of your show data.
